Art Unit: 1725

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-33, drawn to a method, classified in class 427.

II. Claims 34-67, drawn to an apparatus, classified in class 428.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the article can be made by welding, soldering, or brazing.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

If applicant elects group I, applicant must additionally elect the following:

4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Ia. Claims 1-2 drawn to bonding two components.

Ib. Claims 1 and 3 drawn to electroplating.

Ic. Claims 1 and 4 drawn to electroless plating.

Art Unit: 1725

- Id. Claims 1 and 5 drawn to dielectric particles.
- Ie. Claims 1, 6-17 drawn to diffusion bonding of particles.
- If. Claims 1, 6, 18, 29-33 drawn to vibration.
- Ig. Claims 1, 6, 19 drawn to electrical current.
- Ih. Claims 1, 6, 20 drawn to foam of particles.
- Ii. Claims 1, 6, 21, 22 drawn to liquid species.
- Ij. Claims 1, 6, 23-25 drawn to corroding.
- Ik. Claims 1, 6, 26 drawn to applying pressure.
- Il. Claims 1, 6, 27 drawn to plating.
- Im. Claims 1, 6, 28 drawn to providing a solution.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 1725

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
